

# pi-top HARDWARE

## Connect to Further

Required: pi-top[4] & Device

- 1 **Power the pi-top[4] on** by sliding the power button to the left.

- 2 **Press the blue down arrow** on the pi-top, until you see the **IP address** for your pi-top.

If you are using a cable or AP mode see <https://knowledgebase.pi-top.com/knowledge/connecting-with-your-pi-top4> to find your IP address.

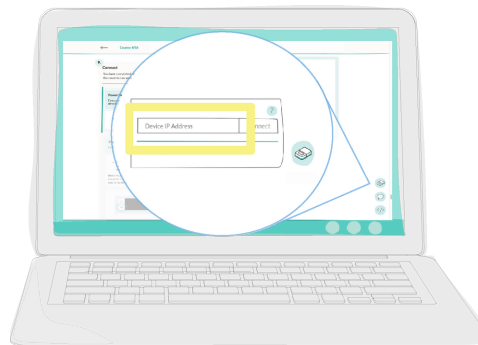

- 3 On a device (computer, laptop, iPad, phone, etc.) **open a tutorial or challenge** @ <https://further.pi-top.com/explore>

- 4 At the bottom right of the Further Window **find and click on the pi-top icon**.

- 5 In the "Device IP Address" box, **type the IP address number you shown on your pi-top**. The periods must be entered as well.

- 6 **Click connect**. The word "connect" should change to "disconnect" when the connection is successful.
